DESIGN BRIEF Why? and What problem or experience do I want my robot to address?

TASK / ELEMENT	WHY?	WHAT I WILL DO	DONE	
 1. DESIGN CRITERIA	Sets clear goals and expectations.	Define the criteria my design must meet.	☐	
 2. LIST OF FEATURES	Helps organize functions and ideas.	List the key features my robot will have.	☐	
 3. INSPIRATION	Builds strong concept from references.	Collect images, colors, textures, and ideas.	☐	
 4. DESIGN PRINCIPLE OF CHOICE	Guides visual and functional decisions.	Choose one principle to focus on and apply.	☐	
 5. SKETCHES	Explores ideas and forms.	Create multiple sketches (front, side, top, perspective).	☐	
 6. MOODBOARD	Defines mood, theme and color direction.	Create a moodboard to communicate the look and feel.	☐	
 7. 3D MODEL	Turns ideas into a real 3D form.	Model my robot in 3D software.	☐	
 8. AR QR CODE	Shares the design in augmented reality.	Upload to HP Reveal and generate QR code.	☐	
 9. CHARACTER STORY	Adds meaning and connection.	Write a short story about my robot.	☐	
 10. DOCUMENTATION	Records the process and final outcome.	Organize my work: sketches, moodboard, model, AR, story.	☐	

DESIGN CRITERIA EXAMPLES (choose or adapt your own)

- My robot is functional and can move.
- My robot has a unique personality.
- My design uses consistent colors and theme.
- My robot solves a problem or helps someone.
- My design is safe, friendly, and accessible.
- My 3D model is well-structured and printable.

NOTES / REFLECTION

What went well?

What can I improve next time?
